## **BURGER KING INTRODUCES LEFT-HANDED WHOPPERS**

*Distributed by PR Newswire on behalf of Burger King*

Burger King UK today announced the launch of its latest salvo in the battle of the Burger Wars - the new left-handed Whopper - which will become available nation-wide tomorrow .

The UK's most preferred hamburger will still consist of lettuce, onions, pickles, mayonnaise, ketchup and four-ounce flame-grilled hamburger patty, but the sandwich has been re-designed to fit more comfortably in the left hand. This will result in fewer condiment 'spills' for left-handed hamburger lovers.

The new Left-Handed Whopper will have all the condiments rotated 180 degrees, thereby redistributing the weight of the sandwich so that the bulk of them skew to the left.

"We have always been proud of the fact that we offered 1,024 ways to order our flagship Whopper sandwich, now we are offering 1,025 ways! It's the ultimate 'Have It Your Way' for our left-handed customers," says Lorraine Thomson, Marketing Director for Burger King UK.

The Left Handed Club estimates that nearly 11 million left-handed customers visit Burger King restaurants in the UK each year. Lauren Milsom from the Club comments: "We are delighted that Burger King has recognised the difficulties of holding a hamburger in your left hand that has a natural right bias to it. We urge all left handed hamburger lovers to visit their nearest Burger King and taste the difference for themselves."

Initially, the Left-Handed Whopper will only be available in the UK, however Burger King is considering plans to roll it out to other countries with large left handed populations.

#### Notes to Editors:

Burger King UK and its franchisees operate 527 restaurants around the country and more than 10,000 restaurants in 53 countries and international territories around the world. In fiscal year 1998, Burger King had system-wide sales of \$10.3 billion. Burger King UK is a subsidiary of Diageo plc, one of the world's leading branded consumer products businesses.

#### Famous Lefties:

- Paul McCartney had a left-handed guitar made especially for him
- 'busty' model Melinda Messenger
- legendary guitarist Jimmy Hendrix
- Supermodel Sophie Dahl
- former England cricketer David Gower
- TV presenter Sarah Green
- former MP Roy Jenkins

#### Lefty Facts:

- 1965 left-handed scissors introduced into the UK
- 1995 the first left handed cheque-book with the stubs on the right was launched by Lloyds bank
- 1998 launch of the Left handed ergonomic computer mouse brought Lefties into the Nineties!

A picture accompanying this release is on the Two-Ten News Network area of the PA Bulletin Board. There is no charge for using the picture or story.

Contact details for all releases are only available to the media via [PR Newswire for Journalists](#).

## Search Web Sites in Other Languages

The screenshot shows a Firefox browser window with the Google Advanced Search interface. The search query is: `general thomas gage "bunker hill" govener -travel, -duck, -hotels, -movies filetype:swf site:uk`. The search parameters are as follows:

- Find web pages that have...
  - all these words:
  - this exact wording or phrase:
  - one or more of these words:  OR  OR
- But don't show pages that have...
  - any of these unwanted words:
- Need more tools?
  - Reading level:
  - Results per page:
  - Language:  (This option does not apply in Google Instant.)
  - File type:
  - Search within a site or domain:
- Page-specific tools:
  - Date: (how recent the page is)
  - Usage rights:
  - Where your keywords show up:
  - Region:
  - Numeric range:

The browser's taskbar at the bottom shows various application icons and the system clock displaying 2:53 AM on 5/29/2011.

Number of languages in Google home page set up = 88

How about?

*Elmer Fudd, Latin, Bork, bork, bork Klingon*

## Search Engine Alternatives

#23-35

## Google Search Alternatives-Why To Use Them

### Map Search with the Map Machine

- **What is the Map Machine?**
- National Geographic's [Map Machine](#) is a gigantic collection of all the National Geographic maps in a searchable online database.
- Best to look at it piece by piece.
- Start with the [Map Machine categories](#) to get a big picture view of all that National Geographic map search.
- Searchable: [world maps](#), [satellite maps of Mars](#), Globe Explorer [aerial imagery](#)

### Map Machine

- <http://maps.nationalgeographic.com/maps>

## **FactBites** <http://www.factbites.com/>

FactBites draws on the web's vast amount of encyclopedias and information websites such as Wikipedia and specialized ones to provide you with factual information

## **Quintura** <http://quintura.com/>

- redefines how search results should be displayed. Instead of just showing you a list descending in order of relevance, they have this accompanied by a tag cloud to the left of the screen.

## **Clusty Search Clusty (aka 'Yippy')** <http://clusty.com/>

- organize them into their respective categories\_
- Clusty is a Deep Web engine that searches other search engines for you. Unlike the regular Web, which is indexed by robot spider programs, Deep Web pages are usually harder to locate by conventional search. That's where Clusty becomes very useful. If you are searching for obscure hobby interest blogs, obscure government information, tough-to-find obscure news, academic research and otherwise-obscure content, then Clusty is your tool.
- [Visit Clusty/Yippy here](#)

## • **Duck Duck Go**

At first, DuckDuckGo.com looks like Google. But there are many subtleties that make this spartan search engine different. DuckDuckGo has some slick features, like 'zero-click' information (all your answers are found on the first results page). DuckDuckgo offers disambiguation prompts (helps to clarify what question you are really asking). And the ad spam is much less than Google. Give DuckDuckGo.com a try... you might really like this clean and simple search engine. [Visit DuckDuckGo here](#)

# 10 cool things you can do with Wolfram Alpha and Siri

<http://www.tuaw.com/2011/10/28/10-cool-things-you-can-do-with-wolfram-alpha-and-siri/>

- **Roll a Random Number.** Say "Wolfram, random integer." Wolfram returns a random value between 0 and 1000. "Wolfram, random number" provides a 0 to 1 floating point value.
- Look up nature facts.** Say, "Wolfram, what is the scientific name of a mountain lion?" It's Puma concolor. Rabbits are Leporidae, and Peacocks, Galliformes.
- Check upcoming holidays.** Say, "How many days until Thanksgiving?" This returns both the number of days as well as a helpful calendar so you can chart out the time until then.
- Create a secure password.** Say "Wolfram, password." Wolfram generates a difficult-to-crack 8-character password. Scroll down for alternates. If you need a longer password, you can append these together.
- Convert text to Morse code.** Say, "What is Morse code for horsefeathers?" You'll see the entire sequence laid out for your tapping pleasure.
- Check your diet.** Say, "How many calories in a small apple?" Wolfram will tell you that there are 75.
- Ask out about time zones.** Say, "Wolfram, what is the local time in Jakarta?"
- Query about your chances.** Say, "Wolfram, what is the probability of a full house?" For a random five-card hand, it's apparently 1 in 694.
- Have fun with pop culture.** Say, "What is the airspeed velocity of an unladen swallow?" or "Wolfram, who shot the sheriff?"
- Visualize colors.** Okay, I've saved the best for last. If you work with colors, this can save you a lot of time. Say, "Wolfram pound sign E 9 7 4 5 1" (for Burnt Sienna / Tangerine) or "Wolfram pound sign 2 9 A B 8 7" (for Jungle Green). This will also convert the colors to RGB values and look up closely-matching brand colors from Benjamin Moore. Make sure to scroll down to catch all the helpful information.

**What is your favorite? Why?**

## [Webopedia](#)

Webopedia is one of the most useful websites on the World Wide Web. Webopedia is an encyclopedic resource dedicated to searching techno terminology and computer definitions. Teach yourself what 'domain name system' is, or teach yourself what 'DDRAM' means on your computer. Webopedia is absolutely a perfect resource for non-technical people to make more sense of the computers around them. [Visit Webopedia here](#)

## [The Internet Archive](#)

- The Internet Archive is a favorite destination for longtime Web lovers. The Archive has been taking snapshots of the entire World Wide Web for years now, allowing you and me to travel back in time to see what a web page looked like in 1999, or what the news was like around Hurricane Katrina in 2005. You won't visit the Archive daily, like you would Google or Yahoo or Bing, but when you do have need to travel back in time, use this search site.
- [Visit the Internet Archive here](#)

[The Ultimate Search Engine List](#): All-purpose search engines, visual search engines, people search engines...you'll find all these and more in this list of search engines, a comprehensive guide to the best search engines on the Web.

[Top 10 Ways to Find Multimedia on the Web](#): Use these search engines to find some great audio files, BitTorrent files, free movie downloads, movie trailers, and all kinds of multimedia.

[100 Search Engines in 100 Days](#): One hundred of the best search engines out there today.

[Top Ten Book Search Engines](#): Whether you're looking for a rare book, a used book, an audio book, or a comic book, chances are you can find it on the Web using one of these excellent book search engines.

[Search Engines for Kids](#): If you have children, or are a child yourself, then this list of search engines and other sites just for kids is for you.

[Google Cheat Sheet](#): You'll find that using these Google Search Shortcuts will greatly cut down on your Google search time, as well as make your Google searches more effective and more efficient.

- [All-Purpose Search Engines](#)
- Need a general, all-purpose search engine? These are the search engines that you can use for almost any search you can come up with, from how to cook pancakes to the mating habits of African wildebeests. [More InfoRead Review](#)
- [Blog Search Engines](#)
- Blog search engines have become more and more sophisticated, and nowadays you can do a blog search on a variety of topics and hit paydirt. Here is a list of some of the best blog search

engines out there - take 'em for a blog search test drive and see what you think.

- **[Book Search Engines](#)**

- Whether you're looking for a rare book, a used book, an audio book, or a comic book, chances are you can find it on the Web using one of these excellent book search engines.[More InfoRead Review](#)

- **[Game Search Engines](#)**

- If you're trying to find a game to play on the Web, you can find some pretty good ones with game search engines - search engines specifically focused on finding online games.[More InfoRead Review](#)

- **[Human-Powered Search Engines](#)**

- Human-powered search engines, better known as Web directories, are popular simply because of the higher quality of links submitted and the caliber of the sites hand-picked to be included in the index. Here are some of the most popular human-powered search engines on the Web.[More InfoRead Review](#)

- **[Image Search Engines](#)**

- These image search engines, directories, and collections will help you to find whatever kind of image you're looking for on the Web; whether it's a piece of clipart, a photograph, a piece of art, or almost anything else you might be searching for.[More InfoRead Review](#)

- **[Invisible Web Search Engines](#)**

- The term "invisible web" mainly refers to the vast repository of information that search engines and directories don't have direct access to, like databases. Unlike pages on the visible Web (that is, the Web that you can access from search engines and directories), information in databases is generally inaccessible to the software spiders and crawlers that create search engine indexes. Fortunately for us, there are search engines that can find these hidden gems.[More InfoRead Review](#)

## **Vlingo** - Voice-based search

- Phone app-say “Coffee shops in Soho”
- Opens up a Google map with all of them marked on it.
- Have been 5 million downloads
- <http://www.vlingo.com/>
- 

## **Pikadeo** - Find products with your phone camera

- Pikadeo is an **image-recognition** tool
- <http://www.androidpit.com/en/android/market/apps/app/com.moodstocks.pikadeo/Pikadeo>
- Recognise **products** from posters, packaging, magazine pages and labels
- Over 200,000 entries over five categories
- [http://download.cnet.com/Pikadeo/3000-31713\\_4-75294104.html](http://download.cnet.com/Pikadeo/3000-31713_4-75294104.html)

## **ScanLife** - Search by barcode

- Cameraphone into a barcode scanner
- [http://web.scanlife.com/us\\_en/](http://web.scanlife.com/us_en/)
- Barcode will take you directly to the correct product
- Check what other people think about the product through the reviews

## **Yummly** - Semantic food search portal

Filter the 500,000 recipes <http://www.yummly.com/>

- Aggregate food recipes from around the web
- Programmed to understand semantic food connections like ‘olive oil is found in Mediterranean cooking’
- Recalculate the amount of ingredients needed when cooking

## Spezify <http://www.spezify.com/>

Spezify **aggregates search results**

- Large number of **Internet data sources**
- Including **social networks**
- Comprehensive results where **Google leave off**
- <http://www.spezify.com/#/lewis%20and%20clark>

## Wikitude - Augmented reality encyclopaedia

- Arrival in a strange city
- Point your phone at a building
- Tell you something of the building's history and point out other places of interest around it
- 10,000 points of interest that mash up geolocation, augmented reality
- <http://www.wikitude.com/en/>

## KartOO

- [KartOO](#)
- An interesting visual meta Search Engine- Interesting results
- <http://www.kartoo.com/>

## Blekko <http://blekko.com/>

- Monthly Searches: 20 000 000 - One year old.
- **block content farms** from the top of search results
- (generates advertising revenue through attracting readers as in **social spam**)
- Its ability to block sites served up to logged-in users - **duplicated in Google's personal block list** for the Chrome Web browser.
- Google **replicated** on its site last February.
- **Search site may be one of the key search engines of the future.**
- **Disney Imagineering :**
- <http://blekko.com/ws/Disney+Imagineering+>

## ixquick.com <http://www.ixquick.com>

They state they are **"the worlds most private search engine"** and will not record your IP address or search history.

- Ixquick uses **meta searching** to classify pages
- Maintains very **strict standards on privacy**

## Gigablast <http://www.gigablast.com>

generate their results solely in house from **their own spiders.**

- **Categorizes** web pages-within the directory
- Marketed as an **environmentally friendly** search engine which uses **wind energy as 90% of its consumption** as apposed to coal.
- Disney Imagineering
- <http://www.gigablast.com/search?k6q=437102&q=Disney+Imagineering+>

## Infospace <http://www.infospace.com/>

- Results from **Google, Yahoo!, Bing, and real-time updates from Twitter**
- All at the same time.
- Lets you **know where it found** said search result
- Help you **compare engines** over the long haul
- Comprehensive

## ZapMeta

- An **Aggregator** of Search Engines
- All Web Results, One Engine

[Search: Yahoo, Microsoft, Gigablast, Gigablast, Altavista, Entireweb etc..](#)

• <http://www.online-convert.com/>

• Convert media files online from one format into another. Please select the target format below:

## Find Photos Online

- **Warning on Usage** - Image search engines help you find the best photos and images online, but that does not make them yours to crop, edit and photoshop. Many of these images you find are **copyrighted and for personal use**.

## What do you know ????

- Do you know how long what you put online exists?
- Do you know what the standard is for appropriate and inappropriate online behaviour?

- Do you know what a digital footprint means?
- Do you know how to take your steps to have a digital footprint that you will be proud of today and tomorrow too?
- Will it be insignificant tomorrow, or in five years when you need to apply for college or seek new employment ?.

Why is your digital footprint important?

## Can you “google” me ?

- What does it mean when a potential employer, college recruiter or client **googles your name and does not find anything** or much?
- What if a principal searches for a potential hire’s name and work and **does not find anything**?
- What does it mean **NOT to have a digital footprint** in these cases?
- Is it positive or does it shed a negative light **on your portfolio/resume**?
- What does it say about you, if you **do not have** a blog, a twitter account, nor other social network identities?
- What does it mean if you, as a teacher do not have a [Digital Teacher Portfolio](#)?

## Digital Dossier - Think before you post

Watch this video first....

[http://www.youtube.com/watch?v=SGlrAhtQC24&feature=player\\_embedded](http://www.youtube.com/watch?v=SGlrAhtQC24&feature=player_embedded)

- **Digital footprints** are traces left by someone’s activity in a digital environment.
- All of us, like it or not, are creating these trails.
- There is all kinds of information **ABOUT YOU** to be found online.

## There is No Delete Button on the Web

The [Internet Archive](#) and its [Way Back Machine](#) gives you a historical snapshot of a site within seconds.

# The Wayback Machine

<http://www.archive.org/web/web.php>

Browse through over 150 billion web pages archived from 1996 to a few months ago. To start surfing the Wayback, type in the web address of a site or page where you would like to start, and press enter. Then select from the archived dates available. The resulting pages point to other archived pages at as close a date as possible. Keyword searching is not currently supported.
